PROFESSIONAL SUMMARY

AI & Data Science graduate with hands-on experience in Machine Learning, Computer Vision, and NLP. Currently contributing to real-world AI solutions at C-DAC, with strong skills in Python and building scalable ML applications.

WORK EXPERIENCE

AI/ML Intern — Centre for Development of Advanced Computing (C-DAC), Thiruvananthapuram

Feb 2025 – Present

- Engineered AIML Solutions in Computer Vision and NLP pipelines using TensorFlow & OpenCV, cutting manual processing effort.
- Optimised ML inference pipelines for real-world deployment, improving video-data throughput.
- Collaborated with engineers on research AI projects.

AI/ML Intern — Google for Developers, AICTE (Remote)

Oct 2024 – Dec 2024

PROJECTS

Pose Normalisation | Python, DWPose, OpenCV, NumPy

[Github](#) [Live Demo](#)

- Designed pipeline extracting & normalising human pose keypoints across sample video frames using DWPose.
- Applied scaling, translation, and alignment techniques ensuring pose invariance across varying orientations and camera angles.
- Reduced downstream model training by standardising skeletal representations across heterogeneous video datasets.

Word Sense Disambiguation | NLP, WordNet, Pytorch

[Github](#) [Live Demo](#)

- Developed an advanced Natural Language Processing (NLP) system for Word Sense Disambiguation (WSD) combined with a specific word scoring mechanism.
- Built an application that automatically detects ambiguous words in a sentence and determines their correct meaning based on contextual understanding.

Low Light Image Enhancement | Python, OpenCV, NumPy, Flask

[Github](#) [Live Demo](#)

- Built an image enhancement system using adaptive filtering and histogram equalisation techniques for low-light.
- Deployed as a Flask REST API, enabling real-time image.

AI Doc Assistant | Streamlit, Google Gemini, Python

[Github](#) [Live Demo](#)

- Developed a web-based AI assistant leveraging the Google Gemini API for document Q&A; and automated summarisation.

TECHNICAL SKILLS

Programming Languages:	Python, Java
AI & Machine Learning:	Machine Learning, Deep Learning, Computer Vision, NLP, Supervised & Unsupervised Learning
Frameworks & Libraries:	TensorFlow, OpenCV, Scikit-learn, NumPy, Pandas, Flask, Streamlit,
Web Development:	HTML, CSS, JavaScript
Databases:	SQL

EDUCATION

B.Tech – Computer Science & Engineering (AI & Data Science)

Dec 2021 – Jun 2025

Guru Nanak Institute of Technology, Ibrahimpatnam | CGPA: 7.38

Intermediate (MPC) – 12th Grade

Jun 2019 – May 2021

NRI Jr College, Bachupally | Percentage: 92.8%

Secondary Education (SSC) – 10th GradeSSC, TSMS Kulakacharla

Jun 2018 – May 2019

TSMS Kulakacharla | CGPA: 9.0

CERTIFICATIONS

- Programming Foundations with Python — Cisco Networking Academy
- Web Development — IBM Skills Build
- Introduction to Data Science — Cisco Networking Academy
- Machine Learning Professional Certification — Altair
